HOW TO ORGANISE A CONGRESS AFTER THE HAND-OVER OF ANOTHER PCO

The **10th Anniversary Congress of the European Society of Minimally Invasive Neurological Therapy (ESMINT)** took place in the Acropolis Convention Centre, Nice, 6 - 8 September 2018. The Annual ESMINT Congress is growing year by year and we are very happy to support the society from this year on.

THE CHALLENGE

The cooperation between ESMINT and Congrex Switzerland was defined on a short-term basis. The society was unable to confirm our partnership until January 2018 – so only eight months were left to plan the whole conference. The congress has been organised by another Professional Congress Organiser before but it was difficult to get all important information on budget, sponsoring prices, contracts etc.

HOW CONGREX MASTERED IT

Thanks to our good cooperation with the congress venue, Nice Acropolis, as well as ongoing exchange and good communication with the client, we managed to deliver the same congress standard as in the previous nine years. The participants hardly recognised the new PCO – only in an even more positive service attitude towards sponsors/ exhibitors and in the flawless handling of participant requests. Exhibiting companies appreciated the flexible and reactive approach of the Congrex team. The participants felt comfortable and well supported.

With the experience of this year, we are looking forward to optimise the congress for future years and make it even more successful.
