

Press Release: Basel, October 20, 2015 – for immediate release

ECTRIMS and Congrex Switzerland renew their long-term contract until 2018.

The European Committee for the Treatment and Research in Multiple Sclerosis (ECTRIMS) re-elects Congrex Switzerland as their Professional Congress Organiser (PCO) until 2018 after a very successful ECTRIMS congress in Barcelona with over 9'000 participants.

“ECTRIMS has been collaborating with Congrex Switzerland as PCO for our annual congress since 1999. Their highly professional approach in conference organisation combined with their caring attitude and passion for details have helped to grow our congresses significantly during this period.” says Prof. Xavier Montalban, President of ECTRIMS. “Their liability, efficiency and expertise are the main reasons why we decided to select Congrex as our long-term partner.”

Julia Bicher, Account Director at Congrex Switzerland, adds: “We are very proud that ECTRIMS has chosen to renew our contract until 2018 and that we can continue to organise memorable conferences with happy participants”.

With over 9'000 delegates from 95 countries ECTRIMS is the world's largest annual international conference devoted to basic and clinical research in multiple sclerosis. After a new record participation in Barcelona two weeks ago, the 32nd Congress of ECTRIMS will take place next year in London (UK) from September 14 to 17, 2016.

About ECTRIMS:

For over thirty years, ECTRIMS has served as Europe's and the world's largest professional organisation dedicated to the understanding and treatment of Multiple Sclerosis.

ECTRIMS mission and goals

The European Committee for Treatment and Research in Multiple Sclerosis (ECTRIMS) is an independent representative European-wide organisation devoted to multiple sclerosis (MS).

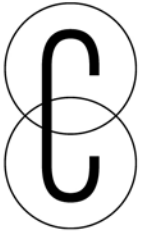

Mission

To facilitate communication, create synergies, and promote and enhance research and learning among professionals for the ultimate benefit of people affected by MS.

Vision

ECTRIMS works with researchers and clinicians of its member countries and with other organizations that share similar missions and objectives on a worldwide scale, creating networking and collaboration opportunities. The ultimate goal of ECTRIMS is to improve basic and clinical research and clinical outcomes in MS.
